Fixed ensemble − whole-duplex-only predictor
(points; 95% pair-clustered CI)
E
Selected predictor: complementary views, fixed integration
PAIR-FIRST INPUT
all valid high/low sites
WHOLE-DUPLEX VIEW
graph message passing → substrate logit
TARGET-ALIGNED VIEW
duplex graph + focal/partner window → local logit
MEAN
0.5 : 0.5
independently trained views · no weight search · no stacker · no post-test fitting
