Incremental information is concentrated in supervision and target-local representation
Pair-first expanded supervision
Target-aligned local view
Fixed global + local ensemble
Shared four-tissue training
Continuous/ordinal auxiliary loss
Substrate-engagement gate
IRAlu/transcript architecture
H3K36me3 peak overlap
RBP suppressor panel
RiNALMo target embedding
Substrate-wide all-A decoder
Unified end-to-end model
95% Alu-pair bootstrap intervals; comparisons use their prespecified same-fold reference
